March 2020

Message to all of our Employees, Vendors, and Clients:

Dynamic Security Technologies (DST) is actively monitoring & responding to the current situation regarding the COVID-19 pandemic. On 3/19/2020, Governor Gavin Newsome had instituted a "Shelter in Place" order all throughout the entire State of California.

Many non-essential businesses were forced to temporarily close, while "essential" businesses are allowed to remain open. There is a lot of confusion regarding which businesses can remain open.

DST will be continuing day-to-day business operations as usual, as many of our clients that we serve provide "essential functions" to our local communities and government. This includes, but is not limited to: Police Stations, Hospitals, Clinics, Healthcare Facilities, Housing, Biotech, Pharma & more.

We are in the business of safety & security. DST is ready to serve the needs of 100% of all our clients.

As we continuously monitor and formulate policies around the CDC, Federal, State, and local jurisdictions, we have implemented a company-wide Safety Protocol for this COVID-19 epidemic:

1. We have honored the voluntary requests of 33% of our field operations staff for them to stay at home throughout the duration of the current "Shelter in Place" Order.
2. Whenever possible, all other staff are working remotely.
3. Our office (in Hayward, CA) is operating at minimum capacity, but still adequately functional.
4. We are individually practicing regular/frequent handwashing, and doing so in abidance to CDC recommended procedures.
5. Whether at home, at our office, or at customer premises, we are practicing Social Distancing and actively cleaning/disinfecting all common surfaces and work areas using company-provided disinfectants, gloves and solutions.

We hope that you and your families remain safe during this unparalleled time of calamity...

Sincerely,  
Bryan Buenaventura

President – Dynamic Security Technologies
